Re: 7588-01 General Engineering
Advice and Consultation

Dear Carol:

We have reviewed the preliminary drawings prepared by Everett Scheflow for the proposed JayCay Court, Sleepy Hollow. The plans appear to be in approval form but would suggest two minor changes:

1. The proposed curb should terminate approximately 5 feet north of the existing seal coat surface of Thorobred. That will place the edge of the curb approx. 15 feet from the center line which would provide a future 30 feet road surface, if at some future date the Village would like to add curb and gutter to the existing streets.
2. We are somewhat concerned that the water coming down the hill in the curb line may tend to roll out into the road of Thorobred. We would suggest that the proposed drainage structures be changed to Neenah Model R-3205 inlet frame, the frame should be dropped somewhat and tipped up stream in order to more completely achieve collection of storm water.

I have discussed these two items with Everett Scheflow and he felt there was no problem with making the changes.

If there are any questions please feel free to contact us.

Sincerely,

Dear Mr. Sivertsen:

Enclosed is a copy of the letter from the village engineering firm outlining their advice concerning your proposed development. In addition to their suggestions, the Village Board further recommends the following two items:

1. Plans should be drawn for a water main connection at Thorobred Lane to the top of Jaycay Court, ending in a fire plug with tap offs installed for all lots. These are to be submitted to the Illinois E.P.A. for approval. Plans should be drawn in consultation with the Sleepy Hollow Water Company. If the Illinois E.P.A. does not approve, due to reasons other than technical, then wells will be approved.
2. The north one-half of Thorobred Lane should be dedicated to the Village.

As you know the Village has approved your preliminary plan with these recommendations.

Sincerely,

Chere Anderson
